PREMIUM GLASS POUR WITH CORAVIN

With the help of Coravin, we are able to pour a range of premium wines by the glass or half bottle.

What is Coravin?

The Coravin System uses a medical grade needle and a capsule of Argon gas to pour a bottle of wine through the cork. The cork is never removed. This helps prevent oxidation, increasing the longevity of the wine. It accomplishes this by first inserting a hollow needle through the cork. Our service staff press the trigger to pressurize the bottle with argon gas. When we release the trigger, the wine pours into the glass. The needle is removed from the cork (a naturally elastic and porous material) which then reseals, protecting the wine from oxidation and leaving the remaining wine unaffected.

Life is too short not to drink premium wine!
